

MAVRX COMES TO MID-WOOD

Mavr_x provides Ultra High Resolution (UHR) imagery of your crops, and is customizable for every grower style. We provide the highest resolution satellite imagery available, *free* of charge!!!! (top right) You can upgrade to Ultra High Resolution (top left) for as little as \$.84 per flight per acre. Sign up and receive custom scouting reports straight to your email every time your crop specialist is in your field. Mavr_x and Mid-Wood are revolutionizing the way fields are scouted to eradicate profit stealing pests before they start.

UHR zooms down to the size of 3 corn plants!!!!

Ask how you can get your first flight free!!!!

Create management zones based on yield, soil profile, satellite imagery, etc.

Manage crop inputs with the latest technology
